What are you excited about re: the upcoming project?

Levi- Using Node Js, learning/implementing new tools, and thinking about a theme and looking forward to having one soon.

Veronica- Learning hibernate on my own. Am mostly thinking about MVP, but am looking forward to doing fun things with it too.

Tenyce- Excited about learning how to use the technology and the experience of planning/creating a new project.

Geoffrey- Taking the theme from last project "Disco Elysium" and applying it, maybe. Excited about learning hibernate and about using Jira.

Ryan-Excited about the expanded tech stack, including ReactJS, Azure and Hibernate.

Catherine- Excited about the new tech incorporated, and about Geoffrey's theme idea "Disco Elysium".
